Summary

I am a self-driven and curious Computer Science student with analytical thinking and a fast-learning mindset. I am passionate about innovative software development, strongly believe in collaboration and thrive in fast-paced environments. I enjoy applying creative thinking and problem-solving to build impactful products. I often initiate personal projects to practice and learn new things. Currently volunteering as a game developer on a project for diabetic patients. Seeking a software engineering position to apply skills in a dynamic and collaborative environment. Open for part-time/full-time positions.

Education

B.Sc. in Computer Science | Ariel University | 2022 – Present

- Built strong foundations in software engineering, algorithms, data structures, OOP, and system design.
- Developed multiple hands-on projects, including an internal competition-winning game.
- Actively maintains a rich GitHub portfolio with diverse personal and academic projects.

Projects

[Check out my interactive portfolio showcasing my projects.](#)

Educational Game for adults with borderline intellectual disability: "Ready, Set, Go!"

- Developed the 3D game using Unity Engine and C#.
- Won in an internal game-development competition.
- Collaborated with the Occupational Therapy team to design a game supporting planning and organization skills.

Volunteering Application "AidLink"

- Designed and developed a platform connecting volunteers with individuals and organizations seeking assistance.
- Developed with Android Studio (Java & Kotlin). Uses Firebase as the backend database for storing users' data.
- Collaborating with a team using Git and Azure DevOps for version control.
- Conducted real-world market research and user interviews to refine the feature set based on user needs.

Thankful Master

- Developed a mobile application encouraging daily gratitude habits. optimized for both Android and IOS deployment.
- Developed with Flutter and Dart, integrated a custom notification system to send timely reminders.
- Engineered an intuitive and user-friendly interface, focusing on visual appeal and ease of navigation.
- Uses Supabase as the backend database for storing user entries and managing authentication.

MultiMotek

- A volunteer project I initiated with the Israeli Diabetes Association. Helps diabetic patients practice self-management strategies.
- Built using Unity (C#), including UX design and health-related logic based on real diabetic scenarios.
- Partnering with domain experts to ensure medical accuracy and practical relevance.

Skills

- Program languages: Experienced with Java, Python, C++, C#, C.
- Operating Systems and Networking: Linux (Ubuntu OS), Wireshark, Socket programming, Git, GitHub.
- Databases: hands-on experience using MySQL, Firebase, Supabase, and MongoDB.
- Deep Learning: Implemented and trained a neural network segmentation model.
- AI: leveraged ChatGPT, Claude, Gemini for self-improvement, learning, and coding.
- Development tools: used Unity, Android Studio, Flutter, Figma for multiple projects.
- languages: Hebrew - native, English and Russian - fluent.

Experience

2025 – Present: Worker at the Security Department at Shapir Civil and Marine Engineering

- Managing truck entry, weighing, and material verification using the Priority ERP system (requiring strong attention to detail).
- Ensuring 100% data integrity between physical materials and digital records using a camera system and Priority.
- Performing security-related tasks such as site monitoring, access control, and incident reporting.

2021 – 2022: Security Management at "G1" control center

- Responsible for assessing security threats and deploying resources effectively.
- Working with the police and other regulatory bodies.
- Made rapid, high decisions to allocate patrols and respond to incidents.

2019-2021 Military Service: Sargent of operations

- Acting as a link between the military and civilian.
- Working in a military-civilian call center environment involved encountering diverse challenges.
- Received personal commendation from the commanding officer for high-quality work and professionalism.
